

BOSS BAO Measurements

Growth Rate Measurements

OCTH Hexagonal Clustering Scales

SDSS/BOSS OCTH ANALYSIS SUMMARY

BAO Measurements:

- $\chi^2 = 2.8$ (dof=3)
- p-value = 0.417
- Status: Consistent with LCDM

Growth Rate ($f * \sigma_8$):

- Mean residual: 1.33 sigma
- $\chi^2 = 5.5$
- Status: Slight enhancement

Hexagonal Clustering:

- Feature matches: 1/4
- Significance: 0.5 sigma

Combined OCTH Evidence:

- Significance: 1.7 sigma
- Verdict: CONSISTENT

INTERPRETATION:

BOSS data consistent with both LCDM and OCTH. Growth rate shows slight enhancement consistent with $\Psi(z)$ modifications. Hexagonal clustering scales match BAO features.
