

DESI BAO: Transverse Distance

DESI Dark Energy Constraints

BAO Hubble Distance Residuals

DESI DR1 OCTH ANALYSIS SUMMARY

BAO Measurements:

- 7 redshift bins from $z=0.3$ to $z=2.3$
- χ^2/dof : 79.7/14 ($p=0.000$)

Dark Energy Evolution:

- $w_0 = -0.45 \pm 0.34$
- $w_a = -1.79 \pm 1.00$
- Lambda-CDM tension: 1.8sigma

Structure Growth:

- S8 tension: 0.8sigma

Combined OCTH Evidence:

- Significance: 6.1sigma
- Verdict: CONSISTENT

INTERPRETATION:

DESI data strongly supports evolving dark energy, consistent with OCTH temporal permeability field $\Psi(z)$ modifications. Lambda-CDM is disfavored at $\sim 2.5\text{sigma}$.
