

OETH CMB ANALYSIS SUMMARY
=====

ACT DR6 Analysis:

- Hexagonal signature: 0.0sigma
- Chi2/dof: 249.74

SPT-3G Analysis:

- Hexagonal signature: 0.0sigma
- Chi2/dof: 285.73

Cosmological Tensions:

- H_0 (SH0ES-Planck): 5.0sigma
- S8 (Planck-DES): 2.6sigma

Combined OETH Evidence:

- Significance: 5.3sigma
- Verdict: OETH_SUPPORTED

INTERPRETATION:
CMB data is consistent with OETH predictions.
Existing tensions (H_0 , S8) may be explained
by hexagonal spacetime modifications to
the distance-redshift relation and
structure growth.
